Evandro Carreira

Web Developer, Graphics Engineer

evandro.carreira@gmail.com   +55 (48) 98454-3845

Evandro Carreira has been working with the development of web technologies and geoprocessing for 10 years, always focusing on innovation and advancement in this constantly growing area. Graduated in Computer Science from UNESP, he believes that information is a modern collective good and should be available to all. He currently focuses his research on space technologies and visual processing, using math concepts as tools to understand and handle data.
